

EASY STEPS TO SELF-KEY SECURITY

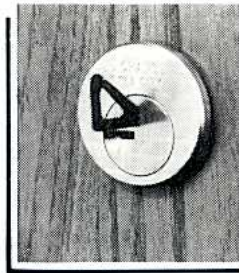

1 Insert U-CHANGE® key which presently fits lock.

2 Turn key clockwise ¼ turn.

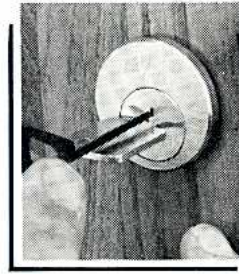

3 Insert change tool.

4 Remove old key.

5 Replace with desired new key.

6 Remove change tool.

7 Turn key back to original position and remove.

The cylinder is now set to your new key and cannot be operated by any other key.

U-CHANGE® LOCK SYSTEMS: SETTING A NEW STANDARD FOR SECURITY!

U-CHANGE® LOCKS are standard size mortise cylinder locks which can be used on any business front requiring mortise cylinders.

U-CHANGE® LOCK INDUSTRIES, Inc. has a national network of experienced service representatives.

U-CHANGE® LOCKS: our patented design gives you the ultimate in key control! Some lock systems might feature a few of the benefits of the U-CHANGE® SYSTEM, but no other lock gives you the level of security, savings and convenience you get from U-CHANGE® LOCK SYSTEMS.

Available in four decorator finishes:
satin chrome, polished brass, antique brass and bronze.

U-CHANGE® LOCK INDUSTRIES, INC.

SECURITY BEGINS AT YOUR DOORSTEP

Companies nationwide spend thousands of dollars each year changing door locks on store fronts, office space or other secure areas. Employee turnover, key loss and improved security are just a few of the reasons.

U-CHANGE® LOCK SYSTEMS now gives you primary access control of your place of business by allowing you the flexibility of rekeying door locks as you need without the delay or expense of a locksmith.

U-CHANGE® LOCK SYSTEMS fit any security device utilizing a standard size mortise cylinder. Entrances, secure areas, gates: all can be easily and quickly rekeyed without extensive training and hardware.

Simplicity is the key.

The U-CHANGE® concept is simply stated: as your security needs change, you change your locks. The result is improved security for your business with unprecedented convenience at tremendous savings.

SECURITY: Potential key loss through turnover, theft or carelessness is a primary security risk. Traditionally changing locks required a locksmith. U-CHANGE® LOCK SYSTEMS gives you a more cost effective solution.

CONVENIENCE: U-CHANGE® LOCK SYSTEMS answers the need for greater key control by reversing the process. Instead of changing the lock, change the key. A simple 30-second process is all that's necessary to set the U-CHANGE® cylinder to a new key. No special training is required.

SAVINGS: Your first-time costs are quickly offset by the on-going savings derived from this simple self-service concept. The savings become even greater for firms with multiple locations. Using one set of U-CHANGE® locks, exchanging key sets out in different locations keeps all areas secure at added savings.

**GET QUALITY SECURITY THROUGH KEY CONTROL
AT SUBSTANTIAL SAVINGS.**
